In re: WIQH, Concord, Massachusetts  
Concord-Carlisle Regional  
School District  
ARN-851105MA

Gentlemen:

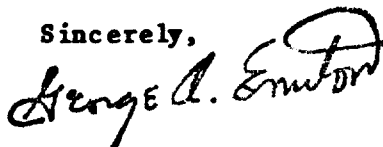

This letter refers to your above-captioned application for a noncommercial educational FM Station construction permit.

A preliminary engineering review reveals that your proposal is in violation of Section 73.509 of the Commission's Rules in that it would involve prohibited overlap of signal strength contours with FM station WERS, file number BLED-1255.

Accordingly, and under Section 0.283 of the Commission's Rules, your application is HEREBY RETURNED. One copy of the application is being retained by the Commission.

In the event this application is mutually exclusive with another application, you will be afforded one opportunity to obtain reacceptance nunc pro tunc to your original submission date by submitting such a request along with a corrected application within 30 days of the date of this letter. In this regard, it should be emphasized that the above deficiency was discerned after a preliminary study of the application. A detailed review was not made of the entire application to determine whether other deficiencies exist which would result in a subsequent dismissal. Inasmuch as you will not be afforded a second opportunity to correct any other deficiency, I would urge that you carefully review the entire application. (See the enclosed Public Notice). If you do not now have it, you may also wish to obtain professional legal and/or engineering assistance.

Sincerely,

Raymond LaForge  
Chief, FM Branch  
Audio Services Division  
Mass Media Bureau
